

# UPHILL TRAVEL POLICY

UPHILL TRAVEL HOTLINE (802)-228-1491

## WINCH GROOMING OPERATIONS

- Winching operations are always marked with reflective signage at the top and bottom of the winching zone.
- **White strobe lights are in place at the top and bottom of the winching zone. White strobes are only utilized for winching operations that are in progress.**
- **Avoid all winching operations and plan ahead by calling the uphill travel hotline at (802)-228-1491.**

## SAFETY GUIDELINES

These guidelines pertain to hiking, snowshoeing and skinning. Use of resort terrain during non-operational hours is done so at your own risk. Outside of operating hours, grooming, snowmaking, snowmobiles, and other operations may occur at any time or at almost any place on the mountain. To help minimize the risks to you and to our staff, we provide the following guidelines:

- It is the uphill user's responsibility to know what Uphill/Downhill routes are open or closed.
- When traveling uphill, travel on the left side of the trail (skier's right).
- When skiing downhill you **MUST** follow the same route you came up.
- Wear bright and reflective clothing and use a bright light at night.
- Avoid trails with active snowmaking and never ski or ride over snowmaking hoses as it puts our system and you at risk
- Pets are not authorized to travel with uphill users of the mountain
- Never ski or ride alone. Be prepared for changes in weather. Snow conditions at night can be much different than daytime conditions
- Ski patrol is not available after resort operating hours. Any emergency response will be significantly delayed and will be handled by outside agencies. **In the event of an emergency call 911.**

For updated approved routes please call the Uphill Hotline (802)228-1491
